
A simple guide to Medicare

Medicare Made Clear® is brought to you by your friends at UnitedHealthcare®

United Healthcare

We're here to help.

You have important decisions to make when you become eligible for Medicare. Our goal is to help you understand your options and feel confident about choosing coverage based on your needs — when you first enroll and every year after that.

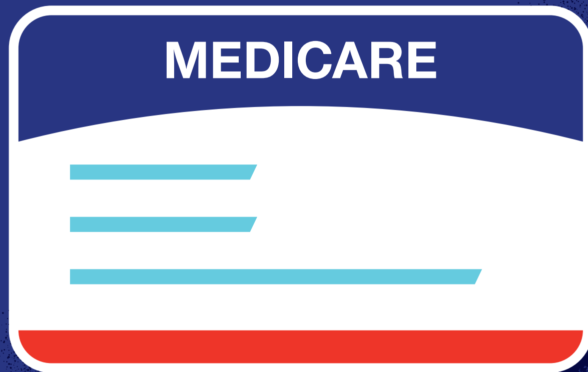
Common Medicare questions and answers 56

Glossary 58



The first step is finding out if you're eligible

Medicare is a federal program that offers health insurance to American citizens and other eligible individuals based on age, disability or a qualifying medical condition. Medicare is individual insurance and doesn't cover spouses or dependents.

To be eligible for Medicare, you must be a U.S. citizen or legal resident

Legal residents must live in the U.S. for at least 5 years in a row, including the 5 years just before applying for Medicare

And, you must meet one of these requirements:

- Age 65 or older
- Younger than 65 with a qualifying disability
- Any age with a diagnosis of end-stage renal disease or ALS

When it's time to enroll:

- You should be automatically enrolled in Medicare Part A and Part B if you are receiving Social Security or Railroad Retirement Board benefits when you become eligible. You'll receive your Medicare card in the mail.
- You need to enroll in Medicare yourself if you aren't receiving Social Security benefits when you become eligible. Go to **SSA.gov/Medicare** to enroll online, or call or visit your local Social Security office.

Medicare is not Medicaid

Both Medicare and Medicaid are government programs. Both programs help people pay for health care. But that's where the similarities end. Medicare is generally for people who are older or disabled. Medicaid is for people with limited income and resources. Medicare is governed by the federal government. Medicaid programs are governed by the states.

Are you turning 65?

You are eligible for Medicare at age 65

You have a 7-month Initial Enrollment Period (IEP) for Medicare. It includes the month you turn 65, the 3 months before and the 3 months after. It begins and ends a month earlier if your birthday is the first day of the month.

Sign up early

Coverage begins the first day of your 65th birthday month if your enrollment is completed during the first 3 months of your IEP. It begins the month before if your birthday is on the first. Your coverage start date may be delayed if you sign up later.

You have choices

You may enroll in Medicare Part A, Part B or both. You may also add additional coverage such as a Medicare Advantage, Part D or Medigap plan.

If you have a disability or medical condition

You will be automatically enrolled in Medicare Parts A and B after your 24th month of disability. You will still have a 7-month IEP. Enrollment timing for people with ESRD or ALS is based on the time of diagnosis and other factors.

Are you working past 65?

You still have an Initial Enrollment Period

You have Medicare decisions to make at age 65 even if you have coverage through an employer plan (yours or your working spouse's). Your IEP happens when you turn 65 whether you continue to work or not. Depending on the employer coverage you have, you may be able to delay enrolling in Medicare without penalty.

Talk with your employer's benefits administrator to understand your options and to determine if your coverage is considered "creditable."

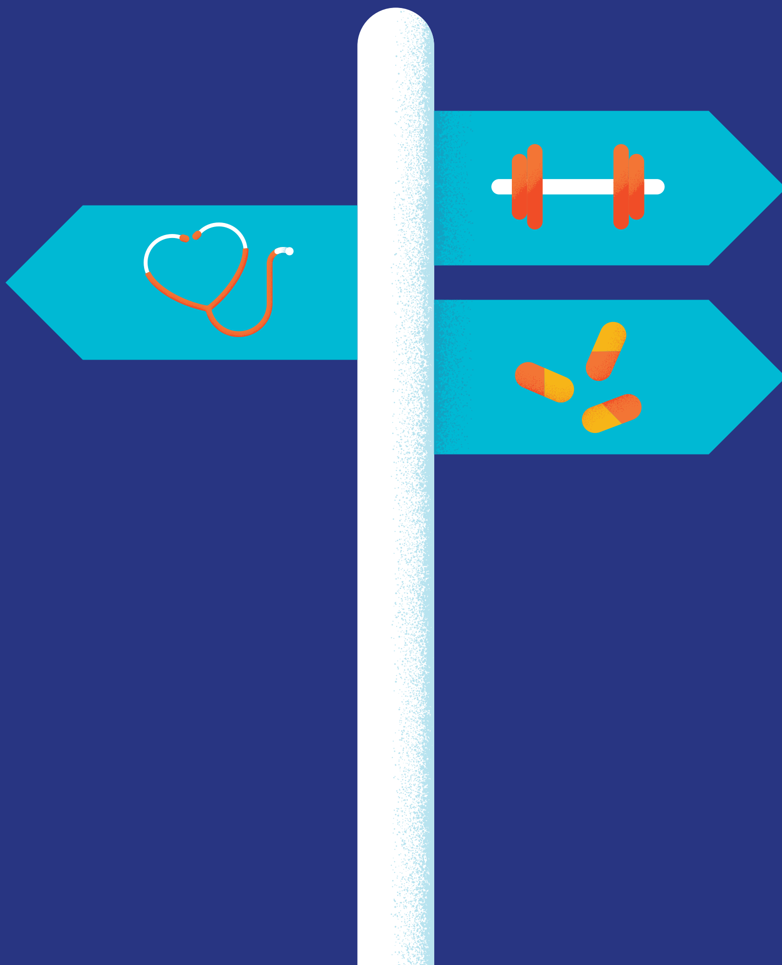
You may be able to delay if:

- The employer has 20 or more employees
- The employer-provided health insurance is considered "creditable"
- The employer doesn't require covered spouses to enroll in Medicare at age 65 in order to remain on the employer's plan

Pay attention to details

You must stop contributing to a health savings account (HSA) once you enroll in Part A or Part B. Also, get a notice of "creditable drug coverage" from your plan administrator. You must have this documentation to avoid the Part D penalty if you plan to delay enrollment.

Now, let's go over your main coverage choices



You can stick with Original Medicare or get more coverage

Original Medicare (Parts A & B) helps pay for doctor visits and hospital stays, but it doesn't cover everything.

Many people choose additional coverage by enrolling in one or more private Medicare or Medicare-related plans, including:

Prescription drug plans (Part D)

Medicare prescription drug plans (Part D) help pay for medications prescribed by a doctor or other health care professional.

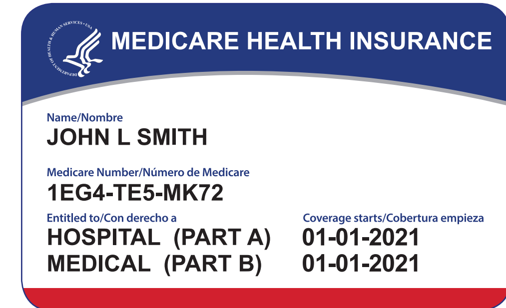
Medicare supplement insurance plans

Medicare supplement insurance plans (Medigap) help pay some of the out-of-pocket costs of Original Medicare.

Medicare Advantage plans (Part C)

Medicare Advantage plans (Part C) combine Part A, Part B and often prescription drug coverage (Part D). Some plans may offer additional benefits like coverage for routine vision and dental care.

Medicare Coverage Options



Step one

First, you need to enroll in Original Medicare

Provided by the federal government

Part A

Helps pay for hospital stays and inpatient care

Part B

Helps pay for doctor visits and outpatient care

Step two

Now, you can look at additional coverage options

Offered by private insurance companies

Option 1

Medicare Part D Plan

Helps pay for prescription drugs

And, you can also add:

Medicare supplement insurance (Medigap)

Helps pay some out-of-pocket costs that come with Original Medicare

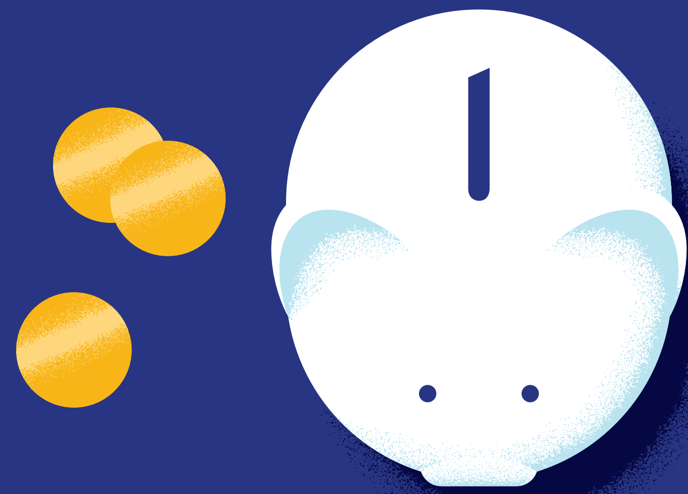
Option 2

Medicare Advantage Plan (Part C)

Combines Original Medicare Part A & Part B coverage in one plan

Usually includes prescription drug coverage (Part D)

May offer additional benefits like vision and dental coverage



Be sure to consider all of your costs

Medicare isn't free. The amount you'll pay depends on the coverage you choose and the health care services you receive.

Costs you may pay with Medicare:

Premium

Medicare Part B has a monthly premium. Some people also pay a premium for Medicare Part A. Medicare Advantage (Part C), Part D and Medigap plans may also have premiums, and amounts will vary by provider and plan.

Deductible

A set amount you pay for covered services before your plan pays.

For example:

$500

You pay up to a limit **Plan pays the rest**

Copay

A fixed amount you pay at the time you receive a covered service.

For example:

$20

You pay a fixed amount **Plan pays the rest**

Coinsurance

A percentage of the cost you pay for a covered service.

For example:

20%

You pay a percentage **Plan pays the rest**

Find out if you qualify for financial help

Many people assume they don't qualify for help, and they never look into it. Don't make that mistake.

If you have a low income and few assets, you may qualify for help through one or more of the following programs:

Medicaid

Medicaid provides health care coverage for people and families with limited incomes. It may also offer some services not covered by Medicare. Each state creates its own program, so contact your state Medicaid office for more information.

If you qualify for both Medicare and Medicaid, you are "dual eligible." In this case, you keep your Medicaid benefits and may get additional benefits from Medicare. The two programs can work together to cover most of your health care costs.

Extra Help Program

This helps pay some or all Part D premiums, deductibles and copays.

Medicare Savings Programs

Medicare Savings Programs help pay some or all Part A and Part B premiums, deductibles and coinsurance. Also, you automatically qualify for the Extra Help program if you qualify for a Medicare Savings Program.

Program of All-Inclusive Care for the Elderly (PACE)

PACE combines medical, social and long-term care services for frail elderly people who live in the community, not in a nursing home. This program is not available in all states.

Income includes:

Money you get from retirement benefits or other money that you report for tax purposes. Income eligibility levels vary by state and program.

To learn more about the financial assistance programs that you may qualify for:

Visit **Medicare.gov**

You can also contact your local Social Security office, Medicaid office or State Health Insurance Assistance Program.

There may be other assistance programs in your state

Medicare Part A

Part A covers hospital stays and most of the inpatient services

Coverage includes:

- A semi-private room
- Your hospital meals
- Skilled nursing services
- Care in special units, such as intensive care
- Drugs, medical supplies and medical equipment used during an inpatient stay
- Lab tests, X-rays and medical equipment as an inpatient
- Operating room and recovery room services
- Some blood transfusions in a hospital or skilled nursing facility
- Inpatient or outpatient rehabilitation services after a qualified inpatient stay
- Part-time, skilled care for the homebound after a qualified inpatient stay
- Hospice care for the terminally ill, including medications to manage symptoms and control pain

Part A costs

Premium

$0

Per month

If you or your spouse made payroll contributions to Social Security for at least 10 years (40 quarters).

Otherwise, your premium could be up to:

$471

Per month

Your premium may be higher if you don't sign up for Medicare when you are first eligible.

Deductible

$1,484

Per benefit period

A benefit period begins the day you are admitted to the hospital and ends when you've been out of the hospital 60 days in a row.

Coinsurance

Home hospice patients may pay a small coinsurance amount for inpatient respite care or durable medical equipment used at home.

Plus, copays for:

Hospital stays

$0 Days 0–60

$371 Per day, Days 61–90

$742 Per day, Days 91+

You have 60 lifetime reserve days of coverage you can use if you're in the hospital longer than 90 days.

Each lifetime reserve day may be used only once, but you may apply the days to different benefit periods. Lifetime reserve days may not be used to extend coverage in a skilled nursing facility.

Skilled nursing facilities

$0 Days 1–20

$185.50 Per day, Days 21–100

Hospice care

Copays during home hospice care may include up to $5 per prescription for pain and symptom management.

Medicare Part B

Part B covers care at a clinic or at a hospital as an outpatient

Coverage includes:

- Doctor visits, including in the hospital
- Annual Wellness Visit
- Ambulatory surgery center services
- Ambulance and emergency room services
- Skilled nursing services
- Preventive services, like flu shots or mammograms
- Clinical laboratory services, like blood and urine tests
- X-rays, MRIs, CT scans, EKGs and some other diagnostic tests
- Some health programs, like smoking cessation, obesity counseling and cardiac rehab
- Physical therapy, occupational therapy and speech-language pathology services
- Diabetes screenings, diabetes education and certain diabetes supplies
- Mental health care
- Durable medical equipment for use at home, like wheelchairs and walkers

Some services may have limitations. Preventive services and screenings are covered on set schedules, such as a yearly flu shot. Other covered services and supplies must be medically necessary to diagnose or treat a disease or condition.

Part B costs

Premium

$148.50 – $504.90

Per month

Part B has a monthly premium that is either deducted from your monthly Social Security benefits check or that you pay directly to Medicare. The amount you pay can vary depending on your tax reported income from two years prior. Monthly Part B premium costs range from $148.50 – $504.90.

You'll pay the standard amount if:

- You enroll for the first time in 2021
- You aren't receiving Social Security benefits
- Your premiums are billed directly to you
- You have Medicare and Medicaid, and Medicaid pays your premiums

You may pay less if:

You enrolled in Part B in 2020 or earlier and your premium payments are deducted from your Social Security check.

You may pay more if:

You will pay an income related monthly adjustment amount (IRMAA) if your reported income from 2019 was above $88,000 for individuals or $176,000 for couples.

Visit **Medicare.gov** to learn more about IRMAA.

Deductible

$203

Per year

Coinsurance

20%

of covered services

You generally pay 20% of the Medicare-approved amount for the covered services you use, with no annual out-of-pocket maximum. Medicare pays the remaining 80%.

Medicare approved amount:

The amount Medicare decides providers should be paid for covered services

Doctors and other providers may accept assignment and take the Medicare-approved amount as payment in full, even if it's less than what they usually charge.

Doctors who do not accept assignment may charge more than the Medicare-approved amount and bill you for the difference. The additional amount they may bill, called "excess charges," is based on:

- Medicare reduces the Medicare-approved amount by 5%
- Medicare pays 80% and you pay 20% of the reduced amount
- The doctor may then charge you an additional amount, up to 15% of the reduced Medicare-approved amount

Enroll in Original Medicare (Parts A & B) on time to avoid late enrollment penalties

Part A Late Enrollment Penalty

10%

of the premium

If you must pay a Part A premium and enroll late, you could pay a penalty. The late enrollment penalty is 10% of the premium. You pay the penalty in addition to your premium for twice the number of years you delay enrollment.

For example

If you delayed enrollment for 2 years, you will pay an additional 10% of the Part A premium for 4 years.

2	x	2	=	4
Years of Delay				Years of Penalty

Part B Late Enrollment Penalty

10%

of the premium

The Part B penalty is 10% of the monthly premium amount for each full 12-month period enrollment is delayed. You pay the penalty in addition to your premium for as long as you have Medicare Part B.

For example

If you delayed enrollment for 3 years, you will pay an additional 30% of the Part B premium as long as you have Part B.

10%	x	3	=	30%
Of Part B Premium		Years of Delay		Total Penalty

Original Medicare (Parts A & B) doesn’t cover everything, like these benefits:

Most care outside of the United States

Personal expenses while hospitalized, such as a TV or phone

Custodial care (care that helps with daily life activities like eating or bathing)

Long-term care

Days spent in a psychiatric hospital beyond certain set limits

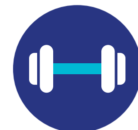
Hospital days beyond set limits

Eye exams, eyeglasses or contact lenses

Hearing exams or hearing aids

Dental exams, cleanings, X-rays or routine dental care

Most prescription drugs



Wellness benefits such as gym memberships

Medicare Part C

Medicare Advantage (Part C) plans combine Part A and Part B benefits

Medicare Advantage plans are offered by private insurance companies approved by Medicare. In addition to Part A and Part B benefits, many plans offer:

Part D prescription drug coverage

Hearing exams or hearing aids

Dental exams, cleanings, X-rays or routine dental care

Eye exams, eyeglasses or contact lenses

Wellness benefits such as gym memberships

Benefits vary by plan and could include other extra benefits such as transportation to medical appointments and virtual visits.

Medicare Advantage plan costs vary by plan provider

Medicare Advantage plans are often premium free

- You will continue to pay your Part B premium directly to Medicare, and your Part A premium too, if you have one.
- Some plans may charge premiums, deductibles, copays or coinsurance.
- Plan premiums can change each year.
- Copay amounts may vary based on the covered item or service.
- Deductibles may be applied to drug benefits and not medical benefits when a plan covers both.
- Coinsurance may apply for some services.

Where you get care can affect your costs

Many Medicare Advantage plans are coordinated care plans and contract with a network of doctors and hospitals.

Some plans may require you to choose a primary care provider from their network, and each plan creates its own network. Certain types of plans may allow for more freedom in choosing providers, but costs could vary based on the selected provider.

Costs for providers and services can vary if they are considered in-network vs out-of-network. In most cases, you pay less for care received from in-network providers than for providers outside the network. All plans are required to offer nationwide coverage for emergency care, urgent care and renal dialysis.

Understanding the out-of-pocket maximum

Medicare Advantage plans are required to set an out-of-pocket maximum, which is the total amount you may pay for covered services during the plan period — usually a calendar year. The goal of the out-of-pocket maximum is to help provide some financial protection for out-of-pocket costs. Original Medicare doesn't offer an out-of-pocket maximum.

Plans can have different out-of-pocket maximums so long as the amount doesn't exceed the year's out-of-pocket maximum limit that is set by Medicare. This limit can change each year. For 2021, it is $7,550.

If you reach the out-of-pocket maximum, your plan will then pay for all your covered costs for the remainder of the plan period.

It is important to understand the following costs do not count towards the out-of-pocket maximum:

- Premium payments
- Drug costs
- Costs of extra health services a plan may offer such as vision or dental

Medicare Advantage coverage and costs will vary from plan to plan and by location and plan provider

Health Maintenance Organization plans (HMO)

Network

Requires you to seek care from providers in your network and choose a primary care provider, who may then manage any care you receive from specialists.

Extra Costs

DOES NOT cover any of the cost for care outside the plan's network, except for emergency care, urgent care and renal dialysis.

Referrals

MAY require you to get a referral for specialty services.

Point of Service plans (POS)

Network

A type of HMO plan that lets you see doctors and hospitals outside the plan network for some covered services.

Extra Costs

Out-of-network care **MAY** result in higher copays or coinsurance.

Referrals

MAY or **MAY NOT** require you to get a referral for specialty services.

Preferred Provider Organization plans (PPO)

Network

Has a provider network you can use but also offers more freedom to choose doctors and other providers outside the plan network for **all** covered services.

Extra Costs

Out-of-network care **MAY** result in higher copays or coinsurance.

Referrals

DOES NOT require you to get a referral for specialty services.

Medicare Advantage plans operate within defined geographic areas called service areas. You must live in a plan's service area to become a member. You may have the following plans to choose from:

Private-Fee-For-Service plans (PFFS)

Provider Choice

Typically you **MAY** see any provider in the United States who accepts Medicare and the plan's payment terms and conditions.

Plan Design

Vary in their coverage and costs.

Referrals

DOES NOT require you to get a referral for specialty services.

Special Needs Plans (SNP)

Plan Design

Designed for people with specific health care needs and usually have plan-specific eligibility requirements.

- Dual-Eligible Special Needs Plans (D-SNPs) for people who have both Medicare and Medicaid
- Chronic Special Needs Plans (C-SNPs) for people living with severe or disabling chronic conditions
- Institutional Special Needs Plans (I-SNPs) for people who live in a contracted skilled nursing facility
- Institutional-Equivalent Special Needs Plans (IE-SNPs) for people who live in a contracted assisted living facility and need the same kind of care as those who live in a skilled nursing facility

Extra Care

MAY provide care managers or nurse practitioners to help members get the care they need.

Medical Savings Account plans (MSA)

Plan Design

Combines a high-deductible health plan with a special savings account.

Coverage

Funds received from Medicare are deposited into the savings account and may be withdrawn tax-free to pay for qualified health care expenses.

Prescription

DOES NOT include prescription drug coverage.

Medicare Part D

Medicare Part D provides coverage for prescriptions and some vaccines

Coverage includes:

Drugs most commonly prescribed for Medicare beneficiaries as determined by federal standards

Specific brand name drugs and generic drugs included in the plan's formulary (list of covered drugs)

Commercially available vaccines not covered by Part B

Part D plans typically do not cover:

- Drugs not listed on a plan's formulary
- Drugs prescribed for anorexia, weight loss or weight gain
- Prescriptions for fertility, erectile dysfunction or cosmetic purposes
- Prescription vitamins and minerals
- Non-prescription drugs (e.g. over-the-counter medications)

You can get prescription drug coverage through a private insurance company in two ways: a stand-alone Part D plan or with a Medicare Advantage plan that includes prescription drug coverage.

The following pages will cover what you need to consider when choosing a Part D plan, such as:

1. Costs vary by plan and provider
2. Each plan has its own formulary (drug list)
3. Some plans have network pharmacies
4. Your costs can vary by the drug stage you are in

You must live in the service area of the Part D or Medicare Advantage plan to enroll

You can find explanations of specific drug costs in each Part D plan's Summary of Benefits or Evidence of Coverage materials

A note to veterans

People who have benefits through the Veterans Affairs may be able to get prescription drug coverage through the VA and may not need Medicare drug coverage. Talk with your VA benefits administrator before making any decisions.

Part D plan costs vary by the plan and provider you choose

Each plan negotiates prices with drug manufactures and pharmacies. Your copays and coinsurance rates are based on these prices and on guidelines set by Medicare.

Premium

Stand-alone Part D plans charge a premium, and the amount will vary based on the plan and the provider. Medicare Advantage plans with drug coverage may or may not charge a premium. If they do, generally they charge one premium for all the plan's benefits — medical, hospital and prescription drugs.

Deductible

Some plans—Part D or Medicare Advantage—may charge a deductible and others don't. Plans may also have a deductible for certain drugs and not for others. Deductible amounts can vary from plan to plan and from one drug tier to another. However, Medicare does set a maximum deductible amount each year that Part D plans can charge. The 2021 annual deductible limit is $445.

Copay

A copay is generally required each time you fill a prescription for a covered drug. Copay amounts may vary based on a plan's formulary tiers (the lower the tier, the lower your cost) as well as which pharmacy you use (in-network vs out-of-network). Each plan sets its own copay terms and amounts, and these can vary from plan to plan.

Coinsurance

Some plans may also set coinsurance rates for certain drugs or drug tiers. You'll want to review the plan's coinsurance terms carefully to understand how much you will pay and how much the plan will pay.

Some plans have a network of pharmacies for you to choose from, while other plans may offer nationwide coverage.

If a plan has a network of pharmacies, your costs may be different if you fill a prescription outside the network.

Additionally, plans may offer mail order service, which offer cost-savings opportunities.

Review the plan's formulary to see if your drugs are covered

A formulary is a list of prescription drugs covered by a plan.

Medicare sets standards for the types of drugs Part D plans must cover, but each plan chooses the specific brand name and generic drugs to include on its formulary.

- Plans may add or remove specific drugs from their drug lists from year to year.
- Changes may be made during the year under certain circumstances, such as if a drug is removed from the market.
- You will be notified by your plan provider when changes happen if it affects a drug you're taking.

Your total prescription drug costs will also be impacted by:

1. The number of prescriptions you take
2. How often you take them
3. If you get them from an in-network or out-of-network pharmacy
4. What Part D coverage stage you are in

Learn more about drug stages on the next page

Your drug costs can vary by the plan's drug tiers

Formulary Tiers

In general, drugs on low tiers cost less than drugs on high tiers. Additionally, plans may charge a deductible for certain drug tiers and not for others, or the deductible amount may differ based on the tier.

Tier	Cost
Tier 1	$
Tier 2	$$
Tier 3	$$$
Tier 4	$$$$
Tier 5	$$$$$

In addition to tiers, plans may also require step therapy for certain drugs.

With step therapy, you must first try a low-cost drug that's been shown to be effective in treating your condition before the plan will cover a more expensive drug. If the low-cost drug doesn't work, then you and your doctor can request approval from the plan to try the next-level treatment.

During the year, you may go through different drug coverage stages

There are four stages, and it's important to understand how each one impacts your prescription drug costs. You may not go through all the stages. People who take few prescription drugs may remain in the **annual deductible stage** or move only to the **initial coverage stage**. People with many, or high-cost medications may move into the **coverage gap** and/or **catastrophic stage**.

The coverage stage cycle starts over at the beginning of each plan year, usually Jan. 1

Annual Deductible	Initial Coverage	Coverage Gap (Donut Hole)	Catastrophic Coverage
You pay for your drugs until you reach your plan's deductible If your plan doesn't have a deductible, your coverage starts with the first prescription you fill.	**You pay a copay or coinsurance, and your plan pays the rest** You stay in this stage until your **total drug costs** reach $4,130 in 2021.	**You pay 25% of the cost for both brand-name and generic drugs in 2021** You stay in this stage until your **total out-of-pocket costs** reach $6,550 in 2021.	**You pay a small copay or coinsurance amount** You stay in this stage for the rest of the plan year.

The coverage gap (donut hole) opens when you and your plan have paid up to a certain limit for your drugs in the one year.

When you're in this stage, you pay a bigger share of the costs for your prescriptions than before. You will exit the coverage gap only when the total amount you and others on your behalf have paid for your drugs reaches another set limit. The limits to enter and exit the coverage gap are set by Medicare, as well as what counts towards reaching the limits, and both can change each year.

If you get Extra Help from Medicare, the coverage gap doesn't apply to you.

Extra Help is a program for people with limited incomes who need help paying Part D premiums, deductibles and copays.

To see if you qualify for Extra help, call:

- Medicare at **1-800-Medicare** (**1-800-633-4227**), TTY **1-877-486-2048,** 24 hours a day, 7 days a week
- The Social Security Administration at **1-800-772-1213**, TTY **1-800-325-0778**
- Your state Medicaid office

What are total drug costs?

The amount you (or others on your behalf) and your plan pay for your covered prescription drugs. Your plan premium payments are not included in this amount.

What are out-of-pocket costs?

The amount you (or others on your behalf) pay for your covered prescription drugs plus the amount of the discount that drug manufacturers provide on brand name drugs when you're in the third coverage stage — the coverage gap (donut hole). Your plan premiums are not included in this amount.

Part D late enrollment penalty

1%

of the premium

The Part D penalty is an additional 1% of the average Part D premium for each month you delayed enrollment. You pay the penalty every month for as long as you have prescription drug coverage.

For example

If you delayed enrollment for 18 months, you will pay an additional 1% of the Part D premium.

18	x	1%	=	18%
Months of Delay				Monthly Penalty

You may have to pay a Part D late enrollment penalty if either of the following are true:

- You didn't enroll in prescription drug coverage when initially eligible for Medicare and didn't have other creditable drug coverage to qualify for enrollment during a Special Enrollment Period.
- You didn't enroll in prescription drug coverage within 63 days of losing your creditable drug coverage (usually from an employer health plan).

Medigap

Medicare supplement insurance (Medigap) plans can help pay some of the out-of-pocket costs not covered by Parts A & B

Plans are offered by private insurance companies but are standardized by the federal government.

All include full or partial coverage for:

- Part A hospital coinsurance
- Part B coinsurance or copays
- Cost of blood transfusions (first 3 pints)
- Costs for 365 extra hospital days
- Hospice care coinsurance

Some may also help pay for:

- Part A deductible
- Part B deductible*
- Cost of foreign travel emergency care up to plan limits
- Part A skilled nursing facility care coinsurance

*Not available for those newly eligible in 2020 or beyond

Medigap plans set their own premium costs

Premium

Medigap plans set their own premiums, though as a general rule, the more generous the coverage, the higher the premium.

Premiums also will vary by provider, even if the plan letter is the same, and premium amounts can change year to year.

Different plans pay different costs

The level of coverage and what you will pay varies by plan.

Some plans split certain costs with you up to a set limit. Others leave certain costs for you to pay on your own. Refer to the chart on the next page to understand how each Medigap plan will cover out-of-pocket costs.

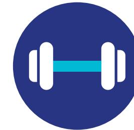
Some Medigap insurers offer value-added services

Medigap insurers may make value-added services available either free or on a discounted basis. These services may come from the insurer or other companies.

Some things that are offered may include:

Discounts on vision, hearing, or dental services

24-hour nurse phone lines



Free or discounted gym memberships

Medigap plans are offered by private insurance companies but are standardized by the federal government

Each plan is labeled with a letter, and all plans with the same letter offer the same benefits nationwide. However, Massachusetts, Minnesota and Wisconsin standardize plans differently.

Important: Please review the note below for Medigap Plans C and F

Plans C and F are only available to individuals who were eligible for Part A or turned 65 before 1/1/20.

Benefits Covered
Part A hospital coinsurance and 365 extra hospital days
Part A deductible
Part B coinsurance or copays
Part B annual deductible
Part B excess charges
Cost of blood transfusions (3 pints)
Cost of foreign travel emergency (up to plan limits)
Hospice care coinsurance cost
Part B preventative care coinsurance
Skilled nursing facility care coinsurance
Yearly out-of-pocket limit before 50% / 75% benefits paid at 100% (2021)

	Plan A	Plan B	Plan D	Plan G**	Plan K	Plan L	Plan M	Plan N	Plan C	Plan F**
	100%	100%	100%	100%	100%	100%	100%	100%	100%	100%
		100%	100%	100%	50%	75%	50%	100%	100%	100%

			100%	100%	50%	75%	100%	100%	100%	100%
					$6,220	$3,110				

* Except certain copays

** Plans F and G also have high deductible versions with a $2,370 deductible before the plans pay the benefits shown.

Is Medicare Advantage or Medigap right for you?

Many people ask the question “Should I get a Medicare Advantage plan or Medicare supplement insurance?” Both are offered by private insurance companies, and with either choice, you continue to pay your monthly Part B premium to Medicare.

The main things to think about when deciding which is right for you are:

- Are you comfortable choosing a health care provider from within a provider network or do you want to be able to choose any provider that accepts Medicare?
- Would you rather have prescription drug coverage included in one plan or buy a separate Part D prescription drug plan?
- Would you rather pay a low or $0 monthly premium and copays for services as you use them or pay more in monthly premiums and have lower out-of-pocket costs for services you receive?

Use this chart to help quickly compare plans.

	Medicare Advantage Plans	Medicare Supplement Insurance Plans (Medigap)
	You can enroll in a Medicare Advantage plan during your Initial Enrollment Period and the Medicare Annual Enrollment Period. If you meet certain criteria, you can enroll or switch to a different plan during the Medicare Advantage Open Enrollment Period or a Special Enrollment Period. You can't be denied coverage or charged more based on your health status.	You can get a Medigap plan after you are 65 or older, and have enrolled in Medicare Parts A & B. You can apply to buy a plan at any time; however, you do have a 6-month Medicare Supplement Open Enrollment Period that begins after you are 65 (or older) and enrolled in Parts A & B. If you enroll during this time you are guaranteed coverage at the best available rate regardless of health status. Outside of this time, your pre-existing health conditions may influence your eligibility for the plan and how much you pay.
	Generally, you pay a low or $0 monthly plan premium in addition to your Part B premium. You will pay any applicable copays, coinsurance and deductibles when you use services. Your total costs may vary depending on whether services are received in-network or out-of-network.	You pay a monthly plan premium in addition to your Part B premium. And when you use services, your out-of-pocket costs are limited, but by how much varies by the Medigap plan you choose.
	Prescription drug coverage is included with most plans. Only certain Medicare Advantage plans can be combined with stand-alone Part D plans. See page 20.	Prescription drug coverage is not included. Consider adding a stand-alone Part D plan.
	You may have a network from which to choose providers. You may choose out-of-network providers, but your plan may not provide coverage or may charge you more for services received. Emergency care is covered in the U.S. and sometimes abroad.	Coverage goes with you when you travel in the U.S. and may cover emergency care when traveling abroad. Medigap plans themselves do not have networks.
	You may be required to use doctors and hospitals in the plan network, though some plans give you the freedom to see any provider that accepts Medicare.	You can select any doctor or hospital as long as they accept Medicare patients.
	You may or may not need referrals to see specialists, depending on the plan.	You can see specialists without referrals.

You have many options when it comes to your Medicare coverage

How do you begin to narrow your choices down?

How do you decide which is right for you?

Your Medicare choices should reflect your personal health and lifestyle needs

Answering these questions can help you feel more confident when shopping for a Medicare plan

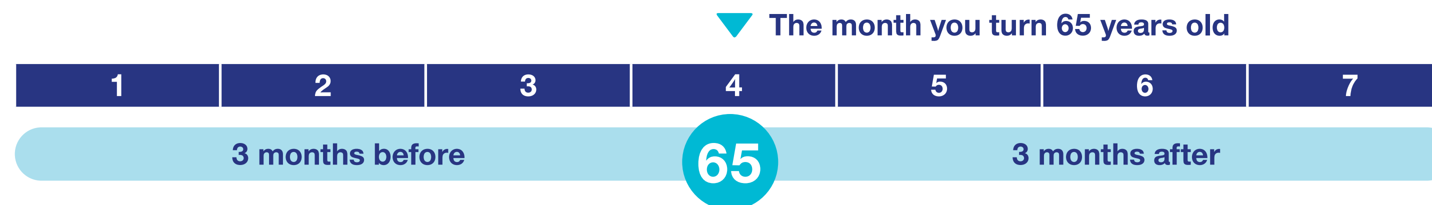
1. Generally, how often do you visit the doctor?
2. What prescription medications do you take? How often?
3. Do you have any major health conditions that you need special care for?
4. What did you pay out-of-pocket for health care in the last 12 months? What did you pay for prescription drugs?
5. Do you want coverage for dental, vision, hearing care services or items?
6. Do you need help paying for Medicare?

Here's an overview of the different times you can enroll

IEP

The Initial Enrollment Period (IEP) is for enrolling near your 65th birthday

For those who become eligible due to age, it includes your 65th birthday month, the 3 months before and the 3 months after. Your IEP begins and ends one month earlier if your birthday is on the first of the month.



Eligible due to a disability?

Your 7-month IEP includes the month you receive your 25th disability check, the 3 months before and 3 months after.

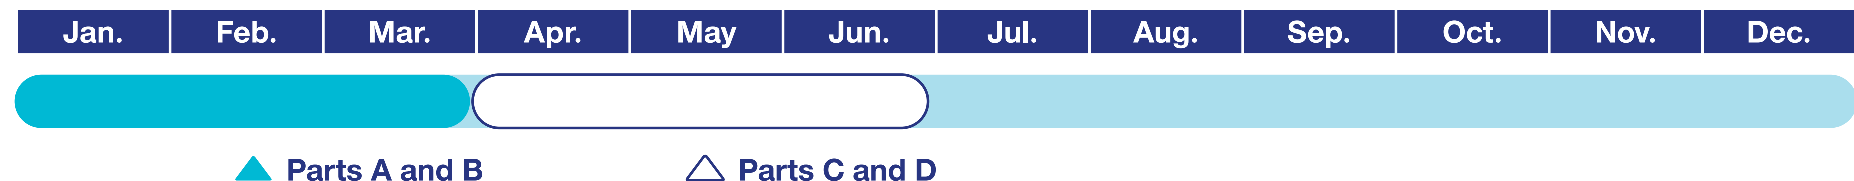
You have 6 months to be guaranteed coverage in a Medicare supplement insurance plan (Medigap), starting the first month you are age 65 or older and enrolled in both Medicare Part A and Part B.

You may apply at other times, but you could be denied coverage or charged a higher premium based on your health history.

GEP

The General Enrollment Period (GEP) is for those who did not sign up around their 65th birthday

You can enroll in Medicare Part A, Part B or both. The GEP happens every year from January 1 to March 31, with coverage beginning July 1. You may enroll in a Medicare Advantage plan (Part C) or a prescription drug plan (Part D) from April 1 to June 30 the same year.



SEP | Medicare provides a Special Enrollment Period (SEP) for enrolling after retiring or losing your employer coverage

If you plan to work past 65 or have employer health coverage through a spouse, you have options:

1 **If an employer has 20 or more employees,** generally you can choose to delay Medicare enrollment, drop your employer coverage for Medicare, or have both Medicare and employer coverage.

2 **If an employer has fewer than 20 employees,** generally you will need to enroll in Medicare during your Initial Enrollment Period.

3 **If you have health coverage through a spouse's employer,** you may be able to delay, or you may need to enroll at age 65 depending on your employer.

You need to have creditable drug coverage to qualify to delay. Creditable drug coverage means the employer drug coverage is at least as good as the standard Medicare Part D plan coverage. Without this, you could face late penalties for Part D if you enroll after your IEP is over.

If you qualify to delay enrolling in Medicare, there are some important things to understand:

- ✔ **You can choose to delay Medicare Part A, Part B or both.** Some people choose to still get Medicare Part A at age 65 because it's usually premium-free for most people.
- ✔ **If you have a health savings account (HSA),** be aware that once you enroll in any part of Medicare you can't continue to make contributions to your HSA.
- ✔ **You will need to provide written proof** of your creditable drug coverage from your employer to avoid Part D penalties.
- ✔ **You do not need to provide notice** that you will delay enrolling unless you're already receiving Social Security or Railroad Retirement Board benefits.
- ✔ **You can delay without penalty** as long as you enroll within 8 months of either losing your (or your spouse's) employer coverage.

You will have 8 months to enroll in Parts A and B and only 2 months for Parts C and D

You have exactly 63 days to get a stand-alone Part D plan or Medicare Advantage plan with prescription drug coverage without penalty.

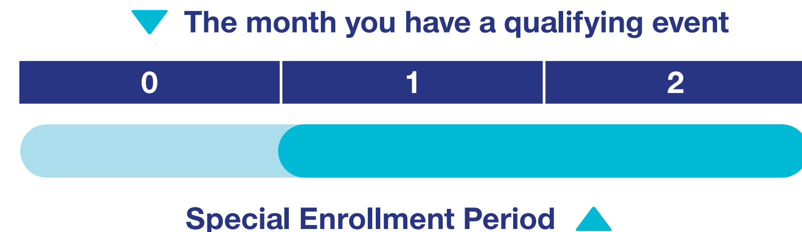
You can make plan changes at certain times of the year

SEP | Medicare also provides a Special Enrollment Period (SEP) for qualifying life events

You have 2 full months after the month of a qualifying event to make plan changes. During this time, you may join, change or drop a Medicare Advantage or Part D prescription drug plan outside of the Medicare Annual Enrollment Period without penalty.

Common events that may qualify include:

- Moving
- Leaving retiree, union or COBRA coverage

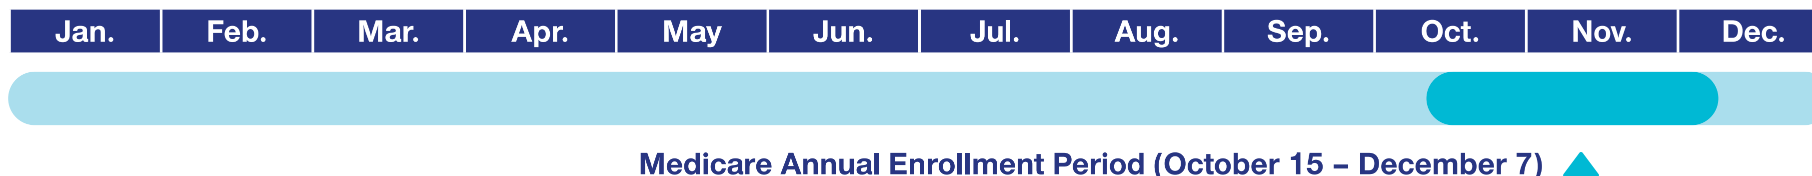


Call your local State Health Insurance Assistance Program (SHIP) office to help you learn more about qualifying events.

AEP

During the Medicare Annual Enrollment Period (AEP) you can join, switch or drop a Medicare Advantage or Part D prescription drug plan and apply for a Medicare supplement insurance plan

You will automatically go back to Original Medicare if you drop a Medicare Advantage plan, and you will lose drug coverage if it was included with your plan. You may replace it with a stand-alone Part D prescription drug plan at this time without penalty. A penalty may apply if you drop drug coverage and decide to get it again later. You can also apply for a Medicare supplement insurance plan if you revert to Original Medicare during the Annual Enrollment Period or later, but remember that your pre-existing health conditions can keep you from being accepted into the plan or result in higher costs.

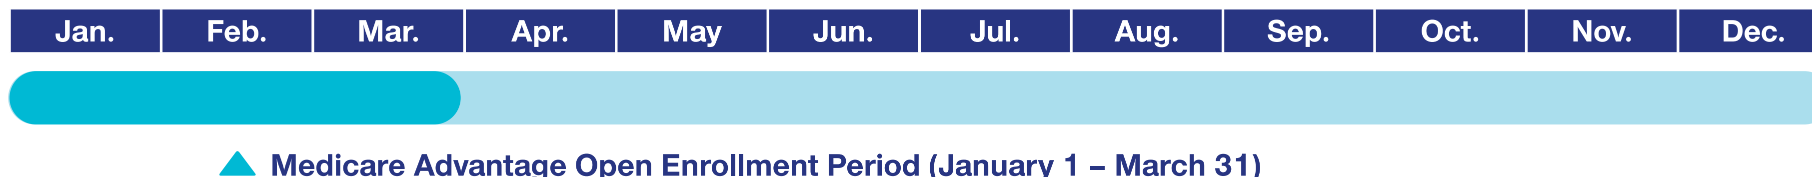


Medicare Annual Enrollment Period (October 15 – December 7)

MAOEP

During the Medicare Advantage Open Enrollment Period (MAOEP) you can switch or drop Medicare Advantage plans

If you're enrolled in a Medicare Advantage plan on January 1, you can make one coverage change between January 1 and March 31. You may switch to a different Medicare Advantage plan or return to Original Medicare. If you go back to Original Medicare, you may also enroll in a Part D plan during this time.



Medicare Advantage Open Enrollment Period (January 1 – March 31)

Combine different Medicare parts and plans for coverage that fits your needs

Your combination options depend on whether you get Medicare Part A and Part B coverage through Original Medicare or through a Medicare Advantage (Part C) plan

Original Medicare

When enrolling in Original Medicare (Parts A & B), you can add a Medicare supplement (Medigap) plan, a stand-alone Part D prescription drug plan or both.

Medicare Advantage

You may choose to get your Part A and Part B benefits through a Medicare Advantage pan (Part C). Many plans come with built-in prescription drug coverage. You can add a stand-alone Part D plan only with certain Medicare Advantage plan types.

Part C

A Medicare Advantage plan without drug coverage

Part C

Part D

A Medicare Advantage plan with built-in drug coverage

Part C

Part D

A Medicare Advantage plan with a stand-alone drug plan added*

*Only applies to certain plans.

How to enroll in:

Original Medicare (Parts A & B)

Original Medicare is provided by the federal government and you'll be automatically enrolled if at age 65 you are receiving Social Security or Railroad Retirement Board benefits, or if you become eligible for Medicare due to disability. If you're not enrolled automatically, you must enroll yourself.

Enroll online at **socialsecurity.gov**, by phone **1-800-772-1213** (TTY **1-800-325-0778**) or visit your local Social Security office.

Part C, Part D and Medigap plans

These plans are only offered by private insurance companies. You will enroll directly with the plan provider — by phone, online or with a local agent.

Remember to review each plan carefully...different providers will offer different plans and benefits.

Meet David

David just turned 65 and is retiring. He doesn't have retiree coverage but is in his Medicare Initial Enrollment Period and he plans to enroll in Medicare.

David takes good care of himself and is generally healthy. He takes a daily prescription drug for his high blood pressure. He is careful to live within his budget.

His benefit wish list includes:

- Coverage for preventive care and other health care services
- Coverage that provides a safety net in case of a serious illness
- Access to specialists
- Prescription drug coverage in case he needs additional medications

David chose a Medicare Advantage plan with built in prescription drug coverage

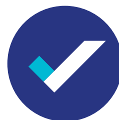
His plan includes:

Preventive care

Fitness program at no additional cost

Built-in prescription drug coverage

Network of local doctors and hospitals



Out-of-pocket maximum of $3,500 per year

His monthly costs:

$148.50
Part B premium

+

$34
Part C premium

+

$15
Prescription copay

$197.50

Base total per month

On top of the base total, David may also have other costs

His out-of-pocket costs may include copays, coinsurance and deductibles. His total spending will vary depending on the specific cost-sharing terms of his plan, the health care services he uses, the prescriptions he fills, and whether the services or items were obtained in-network or out-of-network. Because David's plan has an out-of-pocket maximum of $3,500 for the year, once his out-of-pocket costs for covered services reach that number, his Medicare Advantage plan will be responsible for the rest.

Meet Juanita

Juanita will be 65 in 3 months and plans to retire at that time. Then she plans on spending time traveling from her home in Colorado to visit family in California.

Juanita is in good health. She takes 2 prescriptions — one to keep her bones strong and another to control her cholesterol. She has a comfortable pension but wants to leave a financial legacy for her family so she is careful about what she spends on Medicare.

Her benefit wish list includes:

- Access to doctors and hospitals when she's in California visiting her children
- Help with paying for her prescription drugs
- Peace of mind of knowing that she will have help paying her health care costs if they are high

Juanita chose Original Medicare with a stand-alone Part D plan and Medigap plan G

Her plan includes:

Discounted prices on the drugs she takes

Access to doctors and hospitals throughout the U.S.

Help with costs not paid by Original Medicare

Her monthly costs:

$148.50
Part B premium

+

$34
Part D premium

+

$150
Medigap plan G premium

+

$10
Prescriptions copay

$342.50

Base total per month

Juanita needs to consider how to pay for her prescriptions

A Medicare supplement insurance plan covers most of Juanita's out-of-pocket costs with Original Medicare, but Juanita's prescription drug costs are not covered by her Medicare supplement insurance plan. She will have to look at the cost-sharing terms for her Part D plan to determine additional monthly out-of-pocket costs.

Meet Georgia

Georgia will be 65 next month. She has been working part-time since her husband died five years ago, but her income is limited. Georgia has heart disease, so she sees a heart specialist regularly and takes a blood-thinning medicine every day.

Her benefit wish list includes:

- Health care at an affordable price
- Access to her trusted doctors
- Discounted prices on her prescription drugs
- The possibility of help with her premiums and cost-sharing if she qualifies for low-income assistance

Georgia chose Original Medicare with a stand-alone Part D plan prescription drug plan

Her plan includes:

Access to the doctors and hospitals she uses now

Discounted prices on the drugs she takes

Her monthly costs:

$148.50
Part B premium

+

$34
Part D premium

+

$10
Prescription copay

$192.50
Base total per month

On top of the base total, Georgia may also have other costs

Georgia will have other out-of-pocket costs to cover when she receives different health care services and items. She will be responsible for the costs of services and items not covered by Original Medicare (Parts A & B) as well as the costs defined by the cost-sharing terms of her Part D plan.

Georgia should apply for financial help

Because Georgia has a limited income, she could explore financial help by seeing if she qualifies for the Extra Help program (to help with her Part D costs) and Medicaid. If she qualifies for either program, her costs could be significantly lower for both Original Medicare and Part D.

Meet Matt

Matt is about to turn 65 and lives in Texas. He is an Army veteran with Veterans Administration (VA) benefits. Matt enjoys traveling each year to see his four grandchildren in Arizona and Wyoming. He is retired with good savings but wants to make sure he leaves each of his grandchildren something behind. Matt is in good health and takes only one prescription daily — for lowering his cholesterol. Matt gets this prescription, and any others he needs, through the VA.

His benefit wish list includes:

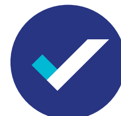
- Access to doctors and hospitals when he's out of state
- Peace of mind knowing that he will have help paying for health care costs if they are high

Matt chose Original Medicare with a Medigap Plan N

His plan includes:

Access to doctors and hospitals throughout the U.S.

Help with costs not paid by Original Medicare



A yearly out-of-pocket limit of $2,940 before 75% of benefits are paid at 100%

His monthly costs:

$148.50
Part B premium

+

$190
Medigap Plan N premium

$338.50

Base total per month

On top of the base total, Matt may also have other costs

Matt's Medicare supplement insurance plan will help with the costs of his Original Medicare (Parts A & B) services, but he will still have some out-of-pocket costs to cover. His costs will vary based on the service he receives, but they will be lower after he meets his Medicare supplement insurance plan's out-of-pocket limit. Matt will also be responsible for the costs of services and items not covered by Original Medicare (Parts A & B) or his Medicare supplement insurance plan.

Matt's VA costs are not included as part of this example and will be separate from his Medicare costs

Meet Karen

Karen is about to turn 65 and retire. She doesn't take any prescription drugs currently and is in very good health. Karen also likes to travel, going to different U.S. National Parks every summer and fall. She is retiring from her position as CEO of a global software company with very strong savings and annual pension. Karen is not concerned about out-of-pocket health care costs and doesn't anticipate needing more than medical and hospital insurance.

Her benefit wish list includes:

- Access to doctors and hospitals throughout the United States
- Basic medical insurance

Karen chose Original Medicare

Her plan includes:

Access to doctors and hospitals throughout the U.S.

Basic medical and hospital insurance

Her monthly costs:

$148.50
Part B premium

$148.50
Base total per month

On top of the base total, Karen may also have other costs

Karen's Medicare coverage only works for health care items and services covered by Medicare Part A and Part B. Karen will be responsible for any out-of-pocket costs that are not covered by Medicare Part A or Part B per Original Medicare cost-sharing terms. And because Karen did not get a Part D prescription drug plan or any other additional coverage, she will be 100% responsible for any costs related to health items and services not covered at all by Medicare Part A or Part B. If Karen decides to join a Part D plan later, she will likely have to pay Part D late penalties because she won't have creditable drug coverage.

Meet Leroy

Leroy is about to turn 65. He has had serious health problems for years. He suffers from diabetes and high blood pressure, and his doctor has told him he needs to lose a considerable amount of weight. Leroy takes insulin and blood pressure medication every day. He has had trouble in the past with interactions with the drugs he is taking.

His benefit wish list includes:

- Expert help with managing his health problems
- Help with improving his diet, exercise and weight management
- Discounted prices on prescription drugs

Leroy chose a Medicare Advantage Special Needs Plan (SNP) for people with diabetes, with built-in prescription drug coverage

His plan includes:

Access to a care manager who will create a plan for coordinating his care

Help with finding out if he qualifies for financial assistance with Medicare costs

Discounted prices on the drugs he takes

Help with adopting a healthier lifestyle

His monthly costs:

$148.50
Part B premium

+

$24
Medicare Advantage Special Needs Plan premium

$172.50

Base total per month

On top of the base total, Leroy may also have other costs

Leroy pays out-of-pocket for services and items he receives during the year. How much he pays is determined by the cost-sharing terms as determined by his plan. His total spending will also depend on the specific health care services he uses and the medications he takes.

Leroy should see if he can also qualify for Medicaid

Because Leroy has been dealing with serious health problems for years, it's likely that his health care costs are high. Leroy should see if he qualifies for Medicaid in his state to see if he may get additional health care coverage and financial help that way.

Medicare Quick Tips

1 There are two ways to get Medicare

Original Medicare (Parts A & B). Part A is hospital coverage and Part B is medical coverage. Original Medicare is provided by the federal government. Benefits and coverage are the same across the country. With Original Medicare, you can also add a standalone Part D prescription drug plan and/or a Medicare supplement insurance plan.

Medicare Advantage (Part C). These plans combine your Part A and Part B coverage, and many also include Part D prescription drug coverage and other benefits such as hearing, vision, dental or fitness. Plans are offered by private insurance companies.

2 There are two ways to get drug coverage

You may add a stand-alone prescription drug plan (Part D) to Original Medicare. Or you may enroll in a Medicare Advantage plan that includes prescription drug coverage.

3 Original Medicare doesn't cover everything

Original Medicare (Parts A & B) doesn't cover everything that you may need for your health. It doesn't include prescription drug coverage, hearing health, dental, vision, wellness services or financial protection. If you want additional coverage, explore plans provided by private insurance companies.

4 Location impacts your coverage choices

Medicare Advantage plans and prescription drug plans vary in terms of coverage and cost. Insurance companies may offer several plans where you live. Medicare supplement insurance (Medigap) plans are standardized and are the same nationwide, except in Minnesota, Wisconsin and Massachusetts.

5 Calculate all your Medicare costs

- You are responsible for monthly premiums plus additional out-of-pocket costs such as deductibles, copays and coinsurance.
- Your costs will vary based on the Medicare coverage you choose, the health services you use during the year and if you have any financial assistance for Medicare costs.

6 Protection from high out-of-pocket costs is available

- Medicare Advantage plans put a cap on your out-of-pocket costs for Part A and Part B services covered by the plan. It's called the "annual out-of-pocket maximum" and it provides built-in financial protection. There is no out-of-pocket cap with Original Medicare. Total out-of-pocket costs and financial protections may vary for in-network vs out-of-network costs.
- Medicare supplement insurance plans help pay some out-of-pocket costs not paid by Original Medicare, like deductibles and coinsurance. A variety of plans are available that offer different levels of financial protection. Medigap plans are organized by letters, such as "Plan A" or "Plan G."
- Both Medicare Advantage and Medicare supplement insurance plans are offered by private insurance companies. You can have either a Medicare Advantage or Medicare supplement insurance plan, but not both together.

7 Timing matters when you first enroll

- Your Initial Enrollment Period (IEP) is your first chance to enroll in Medicare. It is 7 months long — it includes your birthday month or the 25th month of getting disability benefits plus the 3 months before and 3 months after.
- You may qualify to delay Medicare enrollment if you have creditable coverage through your employer or your spouse's employer. If you can delay, you'll have an 8-month Special Enrollment Period (SEP) that begins either when you lose the employer coverage or leave your job, whichever occurs first.
- If you enroll after your Initial Enrollment Period or Special Enrollment Period, you could face late penalties for Medicare Part A, Part B or Part D.

8 You may be able to enroll or make changes at other times

- Medicare offers a General Enrollment Period (GEP) every year January 1 – March 31 for those who have missed their Initial Enrollment Period.
- Medicare provides Special Enrollment Periods (SEP) for qualifying life events. Examples include moving your primary residence or leaving an employer health plan. Visit Medicare.gov for a complete list of qualifying events.
- The Medicare Advantage Open Enrollment Period (MAOEP) is January 1 – March 31 each year. You may switch to a different Medicare Advantage plan or drop a plan and go back to Original Medicare at this time.
- The Medicare Annual Enrollment Period (AEP) happens every year from October 15 to December 7. You may change your coverage during this time if you decide to.

Tips for the Medicare Annual Enrollment Period

The Medicare Annual Enrollment Period (AEP) happens every year from October 15 to December 7
You may change your coverage during this time. You can switch from one Medicare Advantage or Part D plan to another. Or, switch from Original Medicare to a Medicare Advantage plan, or vice versa.

1. **Evaluate your overall health care needs,** especially if your health has changed in the last year

2. **Review your existing Medicare coverage** to evaluate how it fits your health care and lifestyle needs

3. **Review your Medicare Plan Annual Notice of Change (ANOC) letter when you get it (usually in September)** to identify important plan changes to covered benefits, providers, costs and prescription drugs

4. **Evaluate your current health care needs and health care costs** to decide if your current coverage is still a good fit or if you should shop around

5. **Explore available Medicare plan options in your area** to see if something may be a better fit for your health or finances

Tips for caregivers helping make Medicare decisions

Caregivers often find themselves in a position to help a loved one make Medicare decisions, so it's important to be ready for either a loved one's Initial Enrollment Period or the Medicare Annual Enrollment Period (October 15 – December 7).

1. **Get authorized to obtain your loved one's personal health information** by completing a Medicare Authorization Form at **Medicare.gov**

2. **Understand your loved one's health care needs** including their overall health status, daily medications, chronic conditions and more

3. **Understand your loved one's current Medicare coverage (if they already have it)** including what they have, what is and is not covered, how much it costs them each month and who their provider is

4. **As you approach enrollment periods, gather up your loved one's Medicare, personal, insurance and financial information** to make things easier when you are ready to enroll

5. **Evaluate with your loved one** how well their Medicare coverage fits their health care and lifestyle needs each year and identify gaps you may need to fill

Do you need help paying for Medicare?

If you have a low income and few assets, you may qualify for help through one or more programs

- There may also be other assistance programs in your state
- Income includes money you get from retirement benefits or other money that you report for tax purposes
- Income eligibility levels vary by state and program
- Different programs cover costs for different Medicare items
- Some may help with Parts A and B, others with prescription drugs, and some may help with all your Medicare costs

Medicare Savings Programs

Medicare Savings Programs help pay some or all Part A and Part B premiums, deductibles and coinsurance. There are four types of Medicare Savings Programs.

- Qualified Medicare Beneficiary Program (QMB)
- Specified Low-Income Medicare Beneficiary Program (SLMB)
- Qualifying Individual Program (QI)
- Qualified Disabled and Working Individuals Program (QDWI)

If you qualify for a QMB, SLMB or QI Medicare Savings Program you also automatically qualify for the Extra Help program, which helps with Medicare Part D costs.

Extra Help

A program specifically designed to help qualified beneficiaries pay some or all Medicare Part D premiums, deductibles, copayments and coinsurance. The dollar amount provided varies depending on a person's situation.

Medicaid

Medicaid is a joint federal and state health insurance program for low-income individuals and families. Medicaid helps pay costs not covered by Medicare Parts A & B and may also include some additional benefits and services Medicare does not such as long-term care or prescription drugs. Each state creates its own program, so contact your state Medicaid office for more information. Remember, if you qualify for both Medicare and Medicaid, you are "dual eligible." In this case, you keep your Medicaid benefits and may get additional benefits from Medicare. The two programs can work together to cover most of your health care costs.

Program of All-Inclusive Care for the Elderly (PACE)

Programs that provide all the care and services covered by Medicare and Medicaid for individuals age 55 or older who need a nursing home-level of care (as certified by their state), live in the service area of a PACE organization and are able to live safely in their community with PACE's help. This program is not available in all states.

Find out if you qualify for help

Many people assume they don't qualify for financial help, and they never look into it. Don't make that mistake.

Visit **Medicare.gov** to learn more about financial assistance programs. You may also contact your local Social Security office, Medicaid office or State Health Insurance Assistance Program for help.

Here's a list of helpful contacts

Medicare Helpline

Common Medicare questions and answers

Can a Medicare Advantage and Medicare supplement insurance plan work together?

No. A Medicare Advantage and Medicare supplement insurance (Medigap) plan cannot work together. A Medigap plan cannot pay any of your Medicare Advantage premiums, coinsurance, copayments, deductibles or any out-of-network claims.

How do I find out if my doctors, hospitals and pharmacies are in my Medicare plan's network?

You can check the plan's online provider directory or call the plan's customer service number and ask whether your providers and pharmacies are part of your plan's network. You can also call your doctor's office, preferred pharmacy and hospital directly and ask whether they accept the plan.

I have employer health insurance now. What happens to that when I retire?

If you plan to retire at age 65, you will most likely need to enroll in Medicare during your Initial Enrollment Period, which begins three months before your 65th birthday month. However, your employer may offer retiree coverage that could allow you to delay enrolling. Check with your employer's benefits administrator to learn about your options before making any Medicare decisions.

Do I have to enroll myself in Medicare?

It depends. If when you become eligible for Medicare you are receiving Social Security or Railroad Retirement Board benefits, then you will be automatically enrolled. If you are not receiving these benefits, then you will need to enroll yourself in Part A and Part B with the Social Security Administration. If you decide you want a Medicare Advantage (Part C) plan, a Part D prescription drug plan or a Medicare supplement insurance (Medigap) plan, you will need to enroll yourself directly with the private insurance plan provider.

I am planning to work past 65. Do I have to get Medicare?

It depends on your situation. Typically, if your employer has 20+ employers, you may be able to delay without penalty. But if your employer has less than 20 employees, you will likely need to enroll in Medicare. If your spouse is on your employer plan, there may be options to consider as well. Check with your employer's benefits administrator to learn about your options.

More tips on page 5.

What happens if I join a Medicare Advantage plan that uses a network of doctors and hospitals and my doctor leaves the network?

Your Medicare Advantage plan will notify you if your doctor leaves the plan network and you will be able to choose a new doctor. Generally, you can't change plans in this situation until the next Medicare Annual Enrollment (unless you qualify for an exception).

What happens if I join a Medicare Advantage plan, and then move? Can I take my plan with me?

If you stay within your current plan's service area, you can keep your plan. If you move out of your plan's service area, you may qualify for a Special Enrollment Period and enroll in a new plan. You could choose a new Medicare Advantage plan available in the area you're moving to, or you could return to Original Medicare (Part A and Part B), with the option of adding a prescription drug plan (Part D), a Medicare supplement plan or both. Call your current private insurance customer service department to find out the plan's service area.

My spouse is turning 65, retiring and joining Medicare. I'm 61, not working and have always been on my spouse's health insurance. What happens when my spouse joins Medicare?

Medicare is individual insurance, so it won't cover you until you reach age 65, even if your spouse is on Medicare. Find out whether your spouse's current health coverage can cover you after your spouse retires. You may be eligible for COBRA coverage or purchase an individual health insurance policy.

I have Original Medicare plus a Medicare supplement insurance (Medigap) plan. If I join a Medicare Advantage plan, what do I do with my Medicare supplement insurance plan?

Your Medigap plan can't work with a Medicare Advantage plan. If you have a Medigap policy and join a Medicare Advantage Plan (Part C), you may want to drop your Medigap policy. Your Medigap policy can't be used to pay your Medicare Advantage Plan premiums, coinsurance, copayments, deductibles and out-of-network costs.

I already have Medicare. How do I know what kind of Medicare coverage I have?

The insurance card(s) you use when you go to the doctor or a hospital can help you figure out what kind of coverage you have. Original Medicare (Parts A & B) card is red, white and blue, and issued by the federal government through Social Security Administration. A private insurance card is a separate card issued by the plan provider which would be a Medicare Advantage (Part C) plan, a Part D prescription drug plan or a Medicare supplement insurance (Medigap) plan. Call the number on your card to find out more about your plan type.

Here's a glossary of the terms used in this guide

Accept assignment
Doctors and other providers who accept assignment agree to take the Medicare-approved amount as full payment for their services. You may be charged a share of the cost. See page 13.

Benefit period
Under Medicare Part A, a "benefit period" is a period that begins when you are admitted to a hospital for an overnight stay and ends when you have been out of the hospital for 60 days in a row. See page 11.

Brand name drug
A prescription drug that is sold under a trademarked name.

Catastrophic coverage
A Medicare Part D payment stage. In this stage, you pay a small copay or coinsurance rate for your prescription drugs and your plan pays the rest for the rest of the plan period, usually a calendar year. See page 24.

Centers for Medicare & Medicaid Services (CMS)
The federal government agency that runs the Medicare program and works with the states to manage their Medicaid programs.

Coinsurance
A percentage of the cost for a health care service that you pay when you receive it. For example, you might pay 20% of the total allowed cost of a doctor visit and Medicare or your Medicare plan would pay the remaining 80%. See page 8.

Coordinated care plan
A type of Medicare Advantage plan in which your care is coordinated by your primary care provider (PCP). These plans are also referred to as "managed care" plans. See page 17.

Copayment

The fixed amount you pay at the time you receive a covered service or benefit. For example, you might pay $20 when you visit the doctor or $12 when you fill a prescription. Also known as a "copay." See page 8.

Coverage gap

A Medicare Part D payment stage. In this stage you pay 25 percent for covered medications. The coverage gap is also known as the "donut hole." See page 24.

Creditable drug coverage

Prescription drug coverage that provides coverage at least as good as Medicare Part D. You may delay enrolling in Part D without penalty if you have creditable drug coverage.

Custodial care

Care that provides help with daily living activities, such as eating, bathing and getting dressed.

Deductible

A set amount you pay out of pocket for covered services before Medicare, your Medicare plan, or both, begins to pay. See page 8.

Dual eligible

A person who qualifies for both Medicare and Medicaid. See page 9.

Dual Special Needs Plan

A special kind of Medicare Advantage plan that combines your Medicare Part A and Part B benefits, and your Medicare Part D prescription drug coverage; coordinates your plan with your Medicaid plan; and provides extra health benefits not provided by either Medicare or Medicaid. See page 19.

Extra Help

A program that helps eligible people pay for some or all of their Medicare Part D premiums, deductibles and copays. See pages 9, 25.

Formulary

A list of covered prescription drugs. Each plan decides what drugs will be on its formulary. See page 23.

Generic drug

A type of prescription drug that doesn't have a trademarked name but has the same active ingredient formula as a brand name drug. Generic drugs usually cost less than brand name drugs. See page 20.

Group retiree health coverage

Offered by some former employers, unions or trusts to provide their Medicare-eligible retirees additional health and/or drug coverage as part of their retiree benefits package.

Guaranteed renewable policy

A feature of all Medicare supplement plans that guarantees that you can keep the plan each year as long as you pay your premium and don't commit fraud against the insurance company.

Health Maintenance Organization plan (HMO)

A type of Medicare Advantage plan that provides care through a network of doctors and hospitals. If you get care outside the network, you will be responsible for the cost of your care in most cases. Exceptions include emergency care, urgent care and renal dialysis. See page 18.

Home health care

Skilled nursing care and therapy provided to those who are homebound on a part-time or intermittent basis.

Hospice care

Care provided to those who are terminally ill. Hospice care typically focuses on controlling symptoms and managing pain. See page 10.

Initial Enrollment Period (IEP)

A 7-month time period when you first become eligible and may sign up for Medicare. See page 34.

Inpatient care

Care that you receive after you are admitted to a hospital or skilled nursing facility for an inpatient stay. See page 7.

Late enrollment penalty

The additional amount added to your premium if you enroll outside of set enrollment periods. Parts A, B and D may charge late enrollment penalties. See pages 14, 25.

Lifetime reserve days

An additional 60 days of inpatient care that Medicare Part A will cover if you are in the hospital longer than 90 days in one benefit period. Each lifetime reserve day may be used only once. Days may be applied to different benefit periods. See page 11.

Medicaid

A joint federal and state program that helps pay health care costs for individuals and families with low incomes and few assets. See page 9.

Medical Savings Account plan

A type of Medicare Advantage plan that combines a high-deductible health plan with a self directed bank savings account. Funds in the account may be used tax free to pay qualified medical expenses. See page 19.

Medically necessary care

Health care services or supplies that Medicare considers necessary to treat a medical condition.

Medicare

A federal health insurance program for U.S. citizens and legal residents 65 or older and others under 65 with a qualifying disability or medical condition. See page 4.

Medicare Part A

The part of Original Medicare that helps pay for the cost of hospital stays, skilled nursing services following a hospital stay and some other kinds of skilled care. See page 10.

Medicare Part B

The part of Original Medicare that helps pay for the cost of doctor visits and other medical services that don’t involve overnight hospital stays. See page 12.

Medicare Part C (Medicare Advantage)

A private insurance plan that provides Medicare Part A and Part B benefits plus additional coverage. Plans are offered by Medicare-approved insurance companies as an alternative to Original Medicare. See page 16.

Medicare Part D

The part of Medicare that helps pay for the cost of prescription drugs. You can get Medicare Part D coverage as a standalone prescription drug plan or as part of a Medicare Advantage plan. See page 20.

Medicare Advantage Open Enrollment Period (MAOEP)

A yearly time period, January 1 to March 31, during which you may change or drop a Medicare Advantage plan. See page 37.

Medicare-approved amount

The amount Medicare says a provider who accepts assignment can be paid for a covered medical service. Medicare pays part of this amount, and you pay the rest. See also: accept assignment.

Medicare Annual Enrollment Period (AEP)

The period of time from October 15 to December 7 each year when you may join, drop or switch a Medicare Advantage plan or Medicare Part D prescription drug plan. See page 37.

Medicare Savings Programs

Federal financial assistance programs that help eligible people pay some or all of their Medicare premiums and deductibles. See pages 9, 51.

Medicare supplement insurance plan (Medigap)

A type of insurance that helps pay for some of the out-of-pocket costs not paid by Original Medicare. Plans are sold by private insurance companies. Also called Medigap. See page 26.

Medicare Supplement Open Enrollment Period

The first 6 months you are enrolled in Medicare Part B at age 65 or older. During this time, you do not have to answer medical questions and cannot be denied coverage or charged a higher premium due to health problems. (Insurance companies will also require you to be enrolled in Part A to get a Medicare supplement plan.) See page 31.

Network

A group of health care providers, such as doctors, hospitals or pharmacies, that agree to provide care or services to members of a certain health care plan at agreed upon rates. See page 17.

Out-of-network

A health care provider, pharmacy or service not included in your plan’s designated network (see above) that may result in extra costs. See page 17.

Out-of-pocket maximum

The most you could pay during a plan period (usually a calendar year) for covered health care services, if you have a Medicare Advantage plan. This amount does not include premium payments, prescription drug costs or the cost of extra services offered by your plan, such as vision or dental services. See page 17.

Outpatient care

Care provided to a patient who is not admitted to a hospital or skilled nursing facility. See page 7.

PACE

An acronym for Program of All Inclusive Care for the Elderly. PACE provides medical, social and long-term care services to help frail older adults live in their communities rather than in nursing homes or other long-term care facilities.

Point of Service plan (POS)

A type of Medicare Advantage HMO plan that helps pay for certain covered services received outside the provider network. You usually pay more for out of network care. See page 18.

Pre-existing condition

A medical condition you have when you are applying for an insurance policy.

Preferred Provider Organization (PPO)

A type of Medicare Advantage plan that allows you to see doctors and hospitals either in the plan's network or outside of it. You will usually pay a larger share of the cost for care received outside the network. See page 18.

Premium

A fixed amount you pay for Medicare coverage. You may pay the premium to Medicare, your Medicare plan or both, depending on your coverage. Most premiums are charged monthly.

Preventive care

Medical care that is designed to keep you healthy or to find illnesses early, when treatment may be more effective. Examples of preventive care include diabetes screenings, flu shots and mammograms.

Private Fee-For-Service plan (PFFS)

A type of Medicare Advantage plan that allows you to use any doctor or hospital that accepts Medicare and agrees to the plan's terms and conditions of payment. See page 19.

Provider

A person or organization that provides health care services, such as a doctor, hospital, pharmacy, laboratory or outpatient clinic.

Service area

The geographic area in which a Medicare Advantage or Part D plan operates. Plan members must live in the plan's service area. See page 18.

Skilled nursing care

Care provided by a licensed nurse.

Special Needs Plan (SNP)

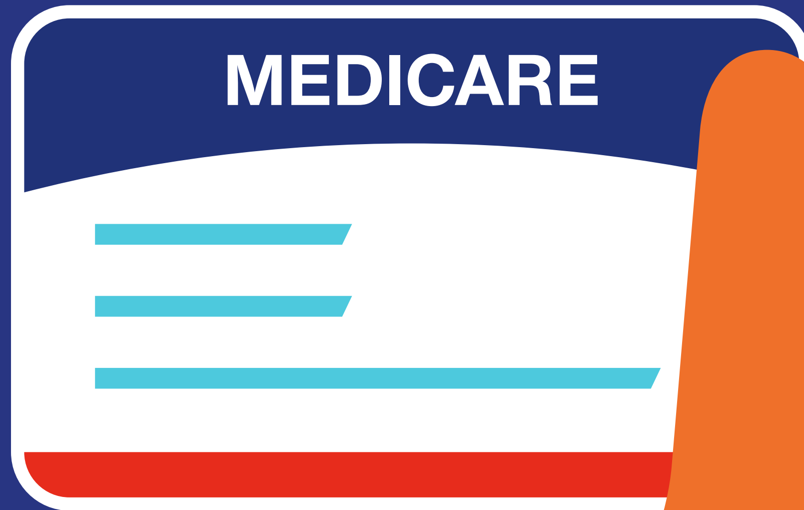
A type of Medicare Advantage plan designed for people who have special health care needs. See page 19.

Step therapy

A type of prior authorization or pre-approval used in Part D where the plan requires you to try a less expensive drug to see if it works before a more expensive drug will be covered. See page 23.

Tiered formulary

A drug list organized into groups based on cost. For example, a generic drug may be on a lower tier and have a lower copay than a brand name version of the drug.



We hope this helped and you find a plan that fits your needs
